DATE MAILED: 12/14/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/029,626

Applicant(s)

DALMIA ET AL.

Examiner

Kaj K Olsen

Art Unit

1753

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3, 5, 6, 9-11, 14 and 16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-3, 5, 6, 9-11 and 14 is/are allowed.
- 6) ☒ Claim(s) 16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Response to Amendment

1. In view of the applicant's amendment to claim 2, the previous ground of rejection under 35 U.S.C. 112 has been withdrawn.
2. In view of the newly submitted Oath, the previous objection to the oath is hereby withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Maclay et al (USP 5,716,506).
5. Maclay discloses a gas sensor comprising a substrate 12 containing both an “active sensor” and a “reference sensor” and each sensor would have a sensing electrode 14 and a counter and reference electrode 16. See col. 9, line 64 through col. 10, line 4. Hence, Maclay discloses both a first sensing electrode (i.e. the sensing electrode for the active cell) and a second sensing electrode (i.e. the sensing electrode for the reference cell). Maclay further discloses that each of the sensing electrodes would have a different thickness of electrolytic material. See col. 8, lines 20-34 and col. 10, lines 12-19. Although Maclay does not appear to teach the presence of a common counter electrode, upon further reviewing of claim 16, this examiner realizes it

Art Unit: 1753

does not require such a common electrode (as the previous examiner interpreted it in the office action of 7/16/2003), but only a counter and reference electrode. Hence any one of the counter electrodes of Maclay would read on the claimed counter and reference electrode of claim 16.

The fact that Maclay teaches the presence of more counter electrodes is irrelevant because claim 16 is constructed with open language (i.e. the invention is *comprising* the set forth features) and the presence of additional features would not read free of the claimed invention. Hence, upon further review of claim 16, Maclay actually anticipates it. However, see the alternative rejection below.

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Maclay in view if any of Nankai et al (USP 5,120,420), Liu (USP 4,655,880) or Lin et al (USP 4,828,671). These secondary teachings are all being cited and relied on for the first time with this office action.

8. Maclay disclosed all the limitations of the claim (see above). However, even if the examiner were to interpret claim 16 as requiring a common or shared counter and reference electrode, the concept of a shared counter/reference electrode is old in the art. In particular, Nankai discloses a embodiment where different sensing electrodes share a common reference electrode. See col. 8, lines 5-68. Liu discloses that the utilizing common reference electrodes is “preferably” a common reference electrode. See col. 4, lines 66-68. Lin discloses embodiments where the counter and reference electrodes are both separate and shared (compare fig. 1 and 5)

Art Unit: 1753

and teaches that the shared electrode systems simplifies the sensor. See col. 2, lines 52-63 and col. 9, lines 7-62. This is a simplification both in reducing the number of electrodes (which reduces manufacturing costs), but also reduce the circuit complexity (note how fig. 1 requires six amplifiers whereas fig. 6 only requires four). It would have been obvious to one of ordinary skill in the art at the time the invention was being made to utilize the teaching of any of Nankai, Liu or Lin for the sensor of Maclay in order to simplify the sensor and reduce its manufacturing costs.

Allowable Subject Matter

9. Claims 1-3, 5, 6, 9-11 and 14 are allowed.

10. The following is a statement of reasons for the indication of allowable subject matter:

Amended claims 1 and 9 set forth the presence of both an electrolytic material and an electrolytic film (with these materials respectively in contact with and covering each sensing electrode) where the electrolytic material has a thickness larger than the thickness of the electrolytic film. These limitations, in conjunction with the other set forth limitations of those claims, is not disclose nor rendered obvious over the prior art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kaj Olsen whose telephone number is (571) 272-1344. The examiner can normally be reached on Monday through Thursday from 5:30 A.M. to 3:00 P.M. and on alternate Fridays.

Art Unit: 1753

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam Nguyen, can be reached on 571-272-1342. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
